

CITH – Walnut - 1

Characteristics and Special Features:

Suitable for export as well as domestic market.

Mature tree expected to yield 60 kg/tree at 20-25 years of age.

Bold nut (27g).

Large kernel size (12.76g).

Good kernel recovery (47%).

Having light kernel color.

Light shell colour.

Long trapezoidal in shape.

Easy to remove kernel halves.

Suitable Growing Region and Season:

Suitable for entire temperate region.

Planted in the month of February-March.

CITH – Walnut - 2

Characteristics and Special Features:

It gives 13.51 g nut weight and 6.61 g kernel weight.

Mature tree expected to yield 60kg/tree at 20-25 years of age.

Well filled kernel and plummy.

Satisfactory kernel flavour.

Complete shell integrity.

Intermediate shell strength.

Strong shell seal.

Medium shell colour.

Medium shell texture.

Nuts are large and ovate.

Easy to remove kernel halves and light kernel colour.

Suitable Growing Region and Season:

Suitable for entire temperate region.

Planted in the month of February-March.

CITH – Walnut - 3

Characteristics and Special Features:

It gives nut weight 16.75 g and kernel weight of 7.69 g.

Mature tree expected to yield 50kg/tree at 20-25 years of age.

Well filled kernel and plummy.

Satisfactory kernel flavour.

Complete shell integrity.

Strong shell strength.

Strong shell seal.

Medium shell colour.

Medium shell texture.

Nuts are large and round.

Difficult to remove kernel halves and light kernel colour.

Suitable Growing Region and Season:

Suitable for entire temperate region.

Planted in the month of February-March.

CITH – Walnut - 4

Characteristics and Special Features:

It gives nut weight 14.24 g and kernel weight of 6.92 g.

Mature tree expected to yield 45kg/tree at the age of 20-25 years.

Well filled kernel and moderately plummy.

Satisfactory kernel flavour.

Complete shell integrity and thin.

Intermediate shell strength.

Strong shell seal.

Light shell colour.

Rough shell texture.

Nuts are large and ovate.

Very easy to remove kernel halves and light kernel colour.

Suitable Growing Region and Season:

Suitable for entire temperate region.

Planted in the month of February-March.

CITH – Walnut - 5

Characteristics and Special Features:

Suitable for export market.

It gives bigger nut (19 g) and kernel (9.5 g) size.

Mature tree expected to yield 50kg/tree at 20-25 years of age.

Good kernel recovery (48.9%).

High yielder.

Light shell color.

Nuts are ovate in shape.

Having extra light kernel color.

Moderate to remove the full kernel halves.

Suitable Growing Region and Season:

Suitable for entire temperate region.

Planted in the month of February-March.
